REQUIREMENT FOR UNITY OF INVENTION

1. As provided in 37 C.F.R. §1.475(a), a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in a national stage application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.
2. The determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim. See 37 C.F.R. §1.475(e).
3. As provided in 37 C.F.R. §1.475(b), a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:
 - (1) A product and a process specially adapted for the manufacture of said product; or
 - (2) A product and process of use of said product; or
 - (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
 - (4) A process and an apparatus or means specifically designed for carrying out the said process; or
 - (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.Otherwise, unity of invention might not be present. See 37 C.F.R. §1.475(c).

Restrictions

4. Restriction is required under 35 U.S.C. §121 and §372.
5. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
6. In accordance with 37 C.F.R. §1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
 - I. Claims 1-10 and 22-31, drawn to a method and apparatus of analyzing a capital investment in a wireless network, classified in class 705 subclass 35.
 - II. Claims 11-15 and 32-36, drawn to a method and apparatus of determining a decommissioning strategy in a wireless network, classified in class 705, subclass 35.
 - III. Claims 16-21 and 37-42, drawn to a method and apparatus of determining an investment strategy for a hole coverage in a wireless network, classified in class 705, subclass 35.
7. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
8. Inventions I - III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and they lack the same corresponding special technical feature. In the instant case:

9. Invention I has separate utility such as a method and apparatus of analyzing a capital investment in a wireless network.

10. Invention II has separate utility such as a method and apparatus of determining a decommissioning strategy in a wireless network.

11. Invention III has separate utility such as a method and apparatus of determining an investment strategy for a hole coverage in a wireless network.

See MPEP § 806.05(d).

12. Applicant is advised that the reply to this requirement to be complete must include an election of an invention to be examined even though the requirement may be traversed (37 C.F.R. §1.143).

13. The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

14. A telephone call was made to Brian A. Carlson on 16 July 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

15. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
